

TEACH Maths Together

80%

of teachers

agree teaching whole classes
with the same calculator
is more effective.

Using the same calculator in lessons allows students to share ideas and work together, helping you to keep progress on track and deliver more collaborative and effective lessons.

It also means that you can make the most of your planning and teaching time, plus focus on teaching mathematical concepts rather than troubleshooting calculator questions. To encourage curiosity and help your lessons flow more easily, mandate a Casio calculator.

77%

of teachers

think using **mixed calculators**
in lessons has a
negative effect on learning.

Choose to mandate Casio calculators in your school.

Reasons to **choose Casio**

Functionality -

Casio Calculators have key features that are missing in other models, such as recurring decimals, prime factorisation and tables for graphs.

Build quality and reliability -

Sub-standard calculators often give incorrect results.

Clear display, menus and key layout -

This is often lacking in sub-standard calculators.

Support and technologies like ClassPad -

Our online emulator and teaching and learning environment creates new possibilities in the classroom.

You can encourage **use of a single calculator model** by

- ✓ **Nominating your school's recommended calculator**
- ✓ **Creating a system to monitor calculator access and use**
- ✓ **Producing a guidance policy for parents and students**
- ✓ **Sharing the policy at key points in the year, via channels such as your website, emails, letters, open evenings and in lessons**
