

Calculators in examinations

We want you to be confident that your Casio calculator is allowed in examinations.

All calculator models sold by Casio UK are permitted in UK school exams. Some models are permitted in Irish and IB exams.

We recognise that schools and students want to ensure that the calculator is correctly set up. Please click on your model below for further help.

For non-school examinations, please refer to your institution's regulations.

There may be functions that you need that are not on the calculator. Please refer to your syllabus and our comparison chart [<https://education.casio.co.uk/comparison-chart>] for functions.

Examination mode

These calculators have an examination mode. Examination mode prevents vector calculations and access to stored data.

UK: Students are required to erase stored data.

We recommend using Examination Mode for A-level Maths (and GCSE, as this is the easiest to verify).

For Further Maths we recommend Exam Reset as this doesn't disable vector arithmetic, and does make the calculator compliant with JCQ regulations.

IB: Examination mode is required for use in examinations. Please refer to IB documentation.

This calculator do not have

- symbolic algebra manipulation
- symbolic differentiation or integration
- ability to store text or mathematical formulae
- language translators

Colour Graphic calculators in examinations

Models

fx-CG50

fx-CG20 (discontinued)

Exam eligibility

These models are **permitted** in all **UK** examinations.

These models are **permitted** in **IB DP** examinations with restrictions.

These models are **not permitted** in **Irish** examinations.

Examination mode

These calculators have an examination mode. Examination mode prevents vector calculations, 3D graphs and access to stored data.

UK: Students are required to erase stored data.

We recommend using Examination Mode for A-level Maths (and GCSE, as this is the easiest to verify).

For Further Maths we recommend Exam Reset as this doesn't disable vector arithmetic and 3D graphs, and does make the calculator compliant with JCQ regulations.

The calculator must be in Examination Mode for any Science examination because the Physium app contains electron configurations in the periodic table.

You can download instructions below.

IB: Examination mode is required for use in examinations. Please refer to IB documentation.

This calculator do not have

- symbolic algebra manipulation
- symbolic differentiation or integration
- ability to store text or mathematical formulae
- language translators
