

## School Calculator Guidance and Policy: Templates

### Preferred specific calculator

Dear Parent/Guardian

Your child will discover many aspects of maths during their school career, and learn many mathematical skills. One important skill is using a calculator correctly and efficiently. This requires a good quality scientific calculator.

In order to help your child get the best results, we would prefer them to have the [Casio fx-83GTX / Casio fx-85GTX / Casio fx-991EX / Other model (specify)] for the start of [insert month] term. This calculator is suitable for all years to GCSE.

[You can buy this directly from the school shop.]

[You can buy this yourself from any reputable retailer or from [casio.co.uk](http://casio.co.uk). Please be sure to check the manufacturer brand and exact model number on the calculator in order to avoid purchasing non-UK models which might not be suitable for our exams.]

Please also note that other calculators may not work in the same way, especially displaying fractions, or may not have required functionality.

Should you have any questions please don't hesitate to get in touch.

Kind regards,
